1. PassengerId、Name、Ticket(票號)為不必要欄位，因此將其刪除。

2. Cabin 缺失值過多，因此選擇直接將此欄刪除。

3. Age 與 Embarked 兩個欄位都有缺失值，把有缺失值的那筆資料，整理直接

   刪除。

```python
# Drop the columns
train_data = train_data.drop(['Cabin','Name','PassengerId'], axis=1)
train_data = train_data.drop(['Ticket'] , axis =1 )
# Remove the rows with missing values
train_data = train_data.dropna(subset = ['Embarked','Age'])
```
